Lancaster, United Kingdom | +44 7553349858 | gauthamrao13@outlook.com | [LinkedIn](#) | [Portfolio](#)

PERSONAL PROFILE

Detail-driven finance professional with a BCom in Accounting & Finance and an MSc in Money, Banking & Finance, bringing a strong analytical foundation and practical experience across financial reporting, accounts operations, and commercial analysis. Proven ability to manage invoice processing, reconciliations, and credit risk checks with precision, while ensuring compliance with internal controls and accounting standards. Skilled in translating financial data into clear, actionable insight through KPI reporting, variance and P&L analysis, and financial modelling that supports informed business decision-making. Adept at building relationships across international teams, resolving queries efficiently, and adapting quickly to new systems and processes in fast-paced finance environments.

EDUCATION

MSc Money, Banking & Finance

Lancaster University, UK | 2025 – 2026

Relevant Modules: Risk Management, Financial Markets & Institutions, Banking & Financial Intermediation, Quantitative Methods

Bachelor's of Commerce, Accounting & Finance

Savitribai Phule Pune University, Pune, India | 2022 | 8.43 CGPA

Key Areas: Financial Accounting, Corporate Finance, Auditing, Taxation, Cost Accounting

PROFESSIONAL EXPERIENCE

Junior Analyst / Auditor

Dexian | 2023 – 2024

- Conducted financial data analysis to support audit and compliance processes, reviewing financial statements to identify discrepancies and potential risk indicators.
- Performed credit risk awareness checks by examining financial statements and supporting documentation for inconsistencies, liquidity concerns, and reporting gaps.
- Assisted in documentation review and regulatory compliance checks, helping ensure records met internal and external reporting standards.
- Supported Vendor Management System (VMS) operations and other business systems, maintaining accurate and up-to-date financial records, including reviewing vendor invoices and payment documentation to support audit readiness.
- Used advanced Excel — including Pivot Tables, XLOOKUP, conditional logic (IF), and data validation — to prepare financial reports, perform reconciliations, and improve the speed and accuracy of analysis.
- Gained working exposure to Power BI and Tableau for presenting financial and risk data in a clear, visual format.
- Worked with large financial datasets to identify discrepancies, investigate unusual movements and improve reporting accuracy.
- Developed and maintained financial models to support budgeting, forecasting, financial analysis and performance evaluation.
- Produced KPI reports and analysed key financial and operational performance indicators to identify trends, variances and opportunities.
- Performed detailed variance analysis and overhead analysis, investigating movements between actual and expected performance, expenditure trends, and key business drivers
- Supported the preparation and analysis of P&L reporting across business areas, providing visibility into revenue, costs and profitability.
- Assisted with month-end reporting activities, analysing financial results and ensuring accurate and timely management information.
- Conducted commercial analysis to assess business performance, identify opportunities and support financial decision-making.
- Collaborated with finance and wider business stakeholders to understand reporting requirements, resolve queries, and communicate financial analysis clearly.
- Key impact: Strengthened internal financial controls by improving the consistency and accuracy of reporting through structured data verification and detailed analysis.

ERP systems

PROJECTS

Automated DCF Valuation Model — Python & Excel

- Built a discounted cash flow valuation model with financial projections, sensitivity analysis and valuation assumptions, automated using Python and Excel (Click on Portfolio on top to see DCF Model).

Barclays PLC Equity Valuation — Dividend Discount Model (DDM)

- Built a DDM valuation of Barclays PLC (LSE: BARC.L) with a CAPM-derived cost of equity and 5-year DPS/EPS forecast, cross-checked against a RoTE / Price-to-Book framework.
- Analysed FY2019–FY2024 financial statements and key banking ratios to produce a blended intrinsic valuation and investment verdict (Click on Portfolio on top to see DDM Model).

ADDITIONAL INFORMATION

- Certification: Financial Modelling & Valuation – Grant Thornton
- Bloomberg Certifications: Spreadsheet Analysis, Finance Fundamentals, Market Concepts (BMC) & ESG – Bloomberg
- Ongoing US CMA certification
- Technical Exposure: Foundational knowledge of SQL & Python, with experience using AI tools to support automation
- Academic Focus: Risk Management, Credit Analysis, Financial Markets, Budgeting & Controlling
